MUNICIPAL INDEBTEDNESS OF THE CITIES AND CHIEF TOWNS OF THE THREE PRAIRIE PROVINCES

Population as per Census of 1916: Nº 1 = Population; Nº 2 = Total Debt; Nº 3 = Total Debt per Capita; Nº 5 = Utilities per Capita; Nº 9 = School Debt per Capita; Nº 20 = 5% per annum on Total Debt per Capita.
Total Debt Nº 2 = General Debentures including Utilities, Property Owners share of Local Improvement Debt and General Public School Debt less sinking fund in all cases.

Nº 21

This Graph prepared by the undersigned has been done wholly on his personal responsibility. No individual or interest has had at now has any connection directly or indirectly therewith. Its object is to enable the financial condition of the chief Municipalities in the three Prairie Provinces to be readily grasped. Thinking the information contained in it might be of at least interest, possibly value, is the reason for the distribution of same, necessarily a limited one

As was intimated in the last paragraph of the letter of submission of the Graph Nº 12 dated 14th August, 1917, it was felt that there were very considerable errors in the total debt and the following steps were taken to try and eliminate same as far as could be reasonably attained.

With that in view all those to whom Graphs had been sent and are on enclosed Graphs marked (a) were written on 21st August, directing special attention to my letter of transmittal, which formed part of said Graph Nº 12. The response not being as full as desired on the 20th September, the Sect-Treasurer of all those on Graph marked (f) had a copy of the Graph Nº 12 sent them and were urgently requested to afford the desired information, special attention being directed to the closing paragraph in the letter of transmittal and specially desired to send a copy of the financial statement of his Municipality up to 31st December, 1916.

The City Treasurer of Winnipeg under date of 24th September, advised me that regarding the Winnipeg portion of the indebtedness of the Greater Winnipeg Water District to apply to Mr. R. D. Waugh. On the 26th September I applied to that Gentlemen but up to date have had no reply, therefore the statement regarding the total debt of Winnipeg is by said indebtedness less than the correct amount.

Finding that in many cases the Municipalities were an Incorporation seperate from that of the School District, on the 11th October I sent a form prepared to all the Municipalities marked (e) and also to the Secretary of the School Boards in the Municipalities marked (d).

When the replies were received a statement was compiled therefrom, and prior to 21st November a copy thereof was sent to those marked (g), being those who replied, and those marked (b) replied to the letter.

This action of course caused more or less correspondence particularly arising out of the statement sent out to them, and this Graph is the result of the information thus acquired and it is trusted that it probably embraces more places with fair accuracy than any other compilation so far made. The balance of the Graphs is compiled from Weld, Gundy & Co's Municipal Statistics 1917.

In those on this Graph where there is nothing noted under the head of School Indebtedness it may be that the School Debt is not included in the Total Debt. Every reasonable effort was made to obtain detailed and correct information on this head but did not succeed in obtaining the response anticipated and necessary for its accomplishment.

Many Municipalities refuse to furnish the data desired thinking its credit will be adversely affected, others thought the request was gross impertinence.

Most Municipalities claim its debentures for Utilities should not be considered as a part of its indebtedness, insisting they are self-supporting and in some cases revenue bearing.

In the former Graph, Local Improvements Debt was shown under a seperate heading. It has been deemed unnecessary to specify it thus, hence omitted in this.

The labor involved in the compilation of this would have been reduced at least 80% if there were a uniform system of full and correct Municipal accounting adopted.

It was hoped to have issued this in the latter part of December but press of Official duties prevented its issue till the present time.

Calgary 15th March, 1918.

J. W. Peace

Total Debt Nº 2 = General Debentures including Utilities, Property Owners share of Local Improvement Debt and General Public School Debt less sin

This Graph prepared by the undersigned has been done wholly on his personal responsibility. No individual or interest has had or now has any connection directly or indirectly therewith. Its object is to enable the financial condition of the chief Municipalities in the three Prairie Provinces to be readily grasped. Thinking the information contained in it might be of at least interest, possibly value, is the reason for the distribution of same, necessarily a limited one.

As was intimated in the last paragraph of the letter of submission of the Graph Nº 12 dated 14th August 1917, it was felt that there were very considerable errors in the total debt and the following steps were taken to try and eliminate same as far as could be reasonably attained.

With that in view all those to whom Graphs had been sent and are on enclosed Graphs marked (b) were written to on 21st August, directing special attention to my letter of transmittal, which formed part of said Graph Nº 20. The response not being as full as desired on the 20th September, the Sect-Treasurer of all those on Graph marked (f) had a copy of the Graph Nº 12 sent them and were urgently requested to send the desired information, special attention being directed to the closing paragraph in the letter of transmittal, and specially desired to send a copy of the financial statement of his Municipality up to 31st December, 1916.

The City Treasurer of Winnipeg under date of 24th September, advised me that regarding the Winnipeg portion of the indebtedness of the Greater Winnipeg Water District, to apply to Mr. R. D. Waugh. On the 26th September I applied to that Gentleman but up to date have had no reply, therefore the statement regarding the total debt of Winnipeg is by said Indebtedness less than the correct amount.

Finding that in many cases the Municipalities were an Incorporation seperate from that of the School District, on the 11th October I sent a form prepared to all the Municipalities marked (e) and also to the Secretary of the School Boards in the Municipalities marked (d).

When the replies were received a statement was compiled therefrom, and prior to 21st November a copy thereof was sent to those marked (c), being those who replied, and those marked (b) replied to the latter.

This action of course caused more or less correspondence particularly arising out of the statement sent out to them, and this Graph is the result of the information thus acquired and it is trusted that it probably embraces more places with fair accuracy than any other compilation so far made. The balance of the Graphs is compiled from Wood, Gundy & Cos Municipal Statistics 1917.

In those on this Graph where there is nothing noted under the head of School Indebtedness it may be that the School Debt is not included in the Total Debt. Every reasonable effort was made to obtain detailed and correct information on this head but did not succeed in obtaining the response anticipated and necessary for its accomplishment.

Many Municipalities refuse to furnish the data desired thinking its credit will be adversely affected, others thought the request was gross impertinence.

Most Municipalities claim its debentures for Utilities should not be considered as a part of its indebtedness, insisting they are self-supporting and in some cases revenue bearing.

BTEDNESS OF THE CITIES AND CHIEF TOWNS OF THE THREE PRAIRIE PROVINCES

: Nº 2 = Total Debt; Nº 3 = Total Debt per Capita; Nº 5 = Utilities per Capita; Nº 9 = School Debt per Capita; Nº 20 = 5% per annum on Total Debt per Capita.
ures including Utilities, Property Owners share of Local Improvement Debt and General Public School Debt less sinking fund in all cases.

Nº 21

had a copy of the Graph Nº 12 sent them and were urgently requested to send the desired information, special attention being directed to the closing paragraph in the letter of transmittal, and specially desired to send a copy of the financial statement of his Municipality up to 31st December, 1916.

The City Treasurer of Winnipeg under date of 24th September, advised me that regarding the Winnipeg portion of the indebtedness of the Greater Winnipeg Water District to apply to Mr. R. D. Waugh. On the 26th September I applied to that Gentleman but up to date have had no reply, therefore the statement regarding the total debt of Winnipeg is by said indebtedness less than the correct amount.

Finding that in many cases the Municipalities were an Incorporation seperate from that of the School District, on the 11th October I sent a form prepared to all the Municipalities marked (e) and also to the Secretary of the School Boards in the Municipalities marked (d).

When the replies were received a statement was compiled therefrom, and prior to 21st November a copy thereof was sent to those marked (e), being those who replied, and those marked (b) replied to the latter.

This action of course caused more or less correspondence particularly arising out of the statement sent out to them, and this Graph is the result of the information thus acquired and it is trusted that it probably embraces more places with fair accuracy than any other compilation so far made. The balance of the Graphs is compiled from Wood, Gundy & Co's Municipal Statistics 1917.

In those on this Graph where there is nothing noted under the head of School Indebtedness it may be that the School Debt is not included in the Total Debt. Every reasonable effort was made to obtain detailed and correct information on this head but did not succeed in obtaining the response anticipated and necessary for its accomplishment.

Many Municipalities refuse to furnish the data desired thinking its credit will be adversely affected, others thought the request was gross impertinence.

Most Municipalities claim its debentures for Utilities should not be considered as a part of its indebtedness, insisting they are self-supporting and in some cases revenue bearing.

In the former Graph, Local Improvements Debt was shown under a seperate heading. It has been deemed unnecessary to specify it thus, hence omitted in this.

The labor involved in the compilation of this would have been reduced at least 80% if there were a uniform system of full and correct Municipal accounting adopted.

It was hoped to have issued this in the latter part of December but press of Official duties prevented its issue till the present time.

Calgary 15th March, 1918.

W. Pearce
